Project Charter

Project Title: ABC Enrollment & Transfer Center

Project Start Date: 06/30/2011 **Projected Finish Date:** 12/31/2011

Project Manager: Team 1, xxxxxxxxx

Budget Information: \$1,521,140

Project Objectives:

As a result of lack of state and federal funding ETC department is facing staff cuts. We will review current services and propose implementation of new business processes in order to ensure that reductions in services do not affect the overall goals of the district.

Project Success Criteria:

- The project aims to automate various processes,such as; filling an application, updating the database and data retrieval.
- Time, cost and quality metrics and effort estimation models will be implemented.
- Develop list of priority services aligned with district goals.
- Streamline operations within 3 months such that current levels of service can be maintained despite reduction in available resources.
- Shorten processing time after automation of enrollment and transfer services.

Deliverables:

Phase 1: Analysis

In this phase the project management team will analyze the current ETC services. The resulting report should include information on services that are most clearly aligned with the District goals. Opportunities that improve efficiencies in priority services need to be identified.

Phase 2: Implementation Plan

The project team must develop an implementation plan that encompasses the changes recommended in phase 1. This plan needs to address not only which services are being modified and which are new, but also the policy and procedural changes outside the department that will be needed following departmental changes.

The resulting report should provide a prioritized list of recommendations.

Approach:

- 1) Collect user requirements and document it as requirement analysis for user review.
- 2) Write corresponding use cases to cover requirements.
- 3) Prepare system architecture design for user review.
- 4) Develop a detailed design document for major components for new scenarios to be implemented.
- 5) Unit testing, regression testing, and system integration testing will be used during project implementation.
- 6) QA testing and user acceptance testing will be done as a part of the quality assurance phase.

7) Final user acceptance testing will be done prior to the final release of the project

Project Communication Plan:

The Project Team Communications Plan document will be used to define and communicate the plan. The Project Manager is responsible for establishing and maintaining the plan. These should include: reporting, meetings, notices and team building.

The communication plan will include -

1. Developing a process for soliciting employee input (questionnaire, interview, observation, study current business process)
2. Providing reports on the results of the system analysis
3. Making recommendations to the senior management about preferred solutions.

Project Reporting:

- Project Meeting – Agenda
- Project Meeting – Minutes
- Project Action items – Open
- Project Action Items – Closed
- Project Issue Management Form
- Project Issue Management Log
- Project Weekly Time Tracking – Employee
- Project Weekly Time Tracking – Summary
- Project Status Report

Assumptions/Constraints/Risks:

General funds have been severely impacted by budget cuts. The ETC just cut 1.5 general funded positions for the 2011-12 fiscal year so it is unlikely that any of the grant funded positions will be converted to general funded positions. This means any solution has to come in the form of efficiency improvements rather than staffing allocations.

It is crucial to make sure that any changes will promote a transfer process that is consistent with broader district goals and promote student achievement.

Project Wrap Up:

The Project Wrap-up will include Report prepared by the Project Manager after user acceptance testing. Prior to this report, an interview process will be conducted to create the Project Lessons Learned document. All the major activities during project implementation will be rated by the participants and a summary report will be prepared for all the responses. The Lessons Learned Report will also include projects highs and lows for major activities, along with the recommendations for future projects.

Business Case

1.0 Introduction/ Background

The Enrollment and Transfer Center (ETC) is a department of ABC responsible for managing the transfer requests of students in and out of most ABC schools, as well as supporting the routine enrollment process of all new ABC students. The ETC provides a variety of transfer services, including those required by federal, state and local policies. Altogether, the ETC processes approximately 6,000 transfer requests each year. A grant that funds 2.75 employees is set to expire in September 2012. It is unlikely that additional funding will be found.

2.0 Business Objective

In light of imminent staff cuts the department faces, ETC services must be reviewed and a new business process implemented to ensure that reductions in service are focused on preserving the activities that best support the overall goals of the district.

3.0 Current Situation and Problem/Opportunity Statement

There are currently 10 full-time and one part-time (.75) employees in the department. A grant that funds 2.75 employees is set to expire in September 2012. This means the ETC department will be left with 8 employees to cover the work previously done by 10.75 employees.

4.0 Critical Assumption and Constraints

General funds have been severely impacted by budget cuts. The ETC just cut 1.5 general funded positions for the 2011-12 fiscal year so it is unlikely that any of the grant funded positions will be converted to general funded positions. This means any solution has to come in the form of efficiency improvements rather than staffing allocations.

It is crucial to make sure that any changes will promote a transfer process that is consistent with broader district goals and promote student achievement.

5.0 Analysis of Option and Recommendation

- 1.) Do nothing. If nothing is done the ETC department is going to become overloaded. This will lead to a backlog in transfer requests. This is an undesirable outcome. Parents need to know what school their children will attend before the start of the school year.
- 2.) Develop a plan that allows the smaller ETC group to maintain their critical outputs.

6.0 Preliminary Project Requirements

There are two main deliverables for this project that are broken into two phases.

Phase 1: Analysis

In this phase the project management team will analyze the current ETC services. The resulting report should include information on services that are most clearly aligned with the District goals. Opportunities that improve efficiencies in priority services need to be identified.

Phase 2: Implementation Plan

The project team must develop an implementation plan that encompasses the changes recommended in phase 1. This plan needs to address not only which services are being modified and which are new, but also the policy and procedural changes outside the department that will be needed following departmental changes.

The resulting report should provide a prioritized list of recommendations.

7.0 Budget Estimate and Financial Analysis

A preliminary budget estimate suggests that a ROI of 130% can be achieved. This return assumes that the changes will produce the estimated cost savings. The NPV of \$16,805 has a payback period of approximately 2 months.

8.0 Schedule Estimate

The analysis period will take time due to collect surveys and conducting interviews. During that time the cost models will be developed. After making recommendations the bulk of the time will be in implementing the new systems and teaching personnel. The total duration was estimated at 4 months in the financial analysis.

9.0 Potential Risks <p>There are a number of potential risks. One is that there won't be funding available to make the changes needed. This is a large risk since the biggest problem facing the department now is funding. Next is that the changes needed will exceed the estimated duration. Finally the ABC has to buy off on the suggested changes.</p>
10.0 Exhibits <p>Exhibit A: Financial Analysis</p>

Proposed Personnel

Name	Role	Position	Communication and correspondence information.
Superintendent	Sponsor	Superintendent	
ETC Director	Sponsor	ETC Director	
VPSC Grant	Funding source	VPSC Grant	
Kathy	Advisor		abc@abc.com
Chief clerk	How they receive and file info from applicants	Chief clerk	
Placement specialist	Provide info on how placement is carried out	Placement specialist	
Technical analyst	Review of the current information system	Technical analyst	
Data analyst	Review of the current information system	Data analyst	

DJ		Project manager	abc@abc.com
AA		Team Lead	abc@abc.com
GU		Business systems analyst	abc@abc.com
LK		System Integration Specialist	abc@abc.com
DM		System Data Analyst	abc@abc.com
Parent group	For interview		
PTA – parent teachers association	For interview		
Portland teachers association	For interview

Representatives of the City of Portland			
Stationery Supplier			

Team Contract

Project Name: ABC Enrollment & Transfer Center

Project Team Members Names and Sign-off:

Name	Sign-off on Team Contract
Niharika Jeena	Niharika Jeena 6/29/2011
Rafael Colon	Rafael Colon 6/29/11
Aron Yucha	Aron E. Yucha – 6/29/2011
Marty Flansburg	Marty J Flansburg 6/29/11

Code of Conduct: As a project team, we will:

- Work proactively and efficiently towards the completion of project
- Work together to anticipate and prevent problems
- Work honestly within our capabilities
- Prepare meeting minutes so that all the team members will always be informed
- Respect one another through: Culture Awareness, Professional Demeanor, understand culture shock, perceive experience, respect our neighbors, realize confidential information
- Accept Responsibility by: accepting assignments and ensuring integrity
- Accept Fairness by avoiding favoritism and discrimination against others, avoiding and reporting conflict of interest situations among (team members, stakeholders, affiliations & associations), and maintaining impartiality in our decision making process

Participation: We will:

- Every stakeholder should make sure they understand what their responsibilities/expectations are within a the given project
- Be open to new ideas and encourage active participation among team members
- Let project manager know about absence or presence in advance
- Let project manager know about task status(in process/delayed/completed) in advance

Communication: We will:

- Maintain open/dynamic/fluid lines of communication among all stakeholders ensuring all information, documentation, and plans are realized and shared
- Develop, plan, execute a communication plan

- Respect different communication styles among all stakeholders
- Concentrate on solving problems
- Present ideas clearly and concisely
- Use visual means such PPTs, charts, tables to facilitate the discussion to keep all team members on the same pace
- Keep all discussion on track
- To keep stakeholders informed, prepare status reports and progress reports

Problem Solving: We will:

- Invite suggestions from all stakeholders and be open to each idea
- Always use constructive criticism
- Escalation procedure will be created to manage conflicts in team and project

Meeting Guidelines: We will:

- Always prepare an agenda before meeting
- Send meeting minutes within 24 hours of project meetings
- Rotate responsibility to record meeting minutes
- Document all major issues and solutions and send them to project sponsor and team members via email

Stakeholder Register

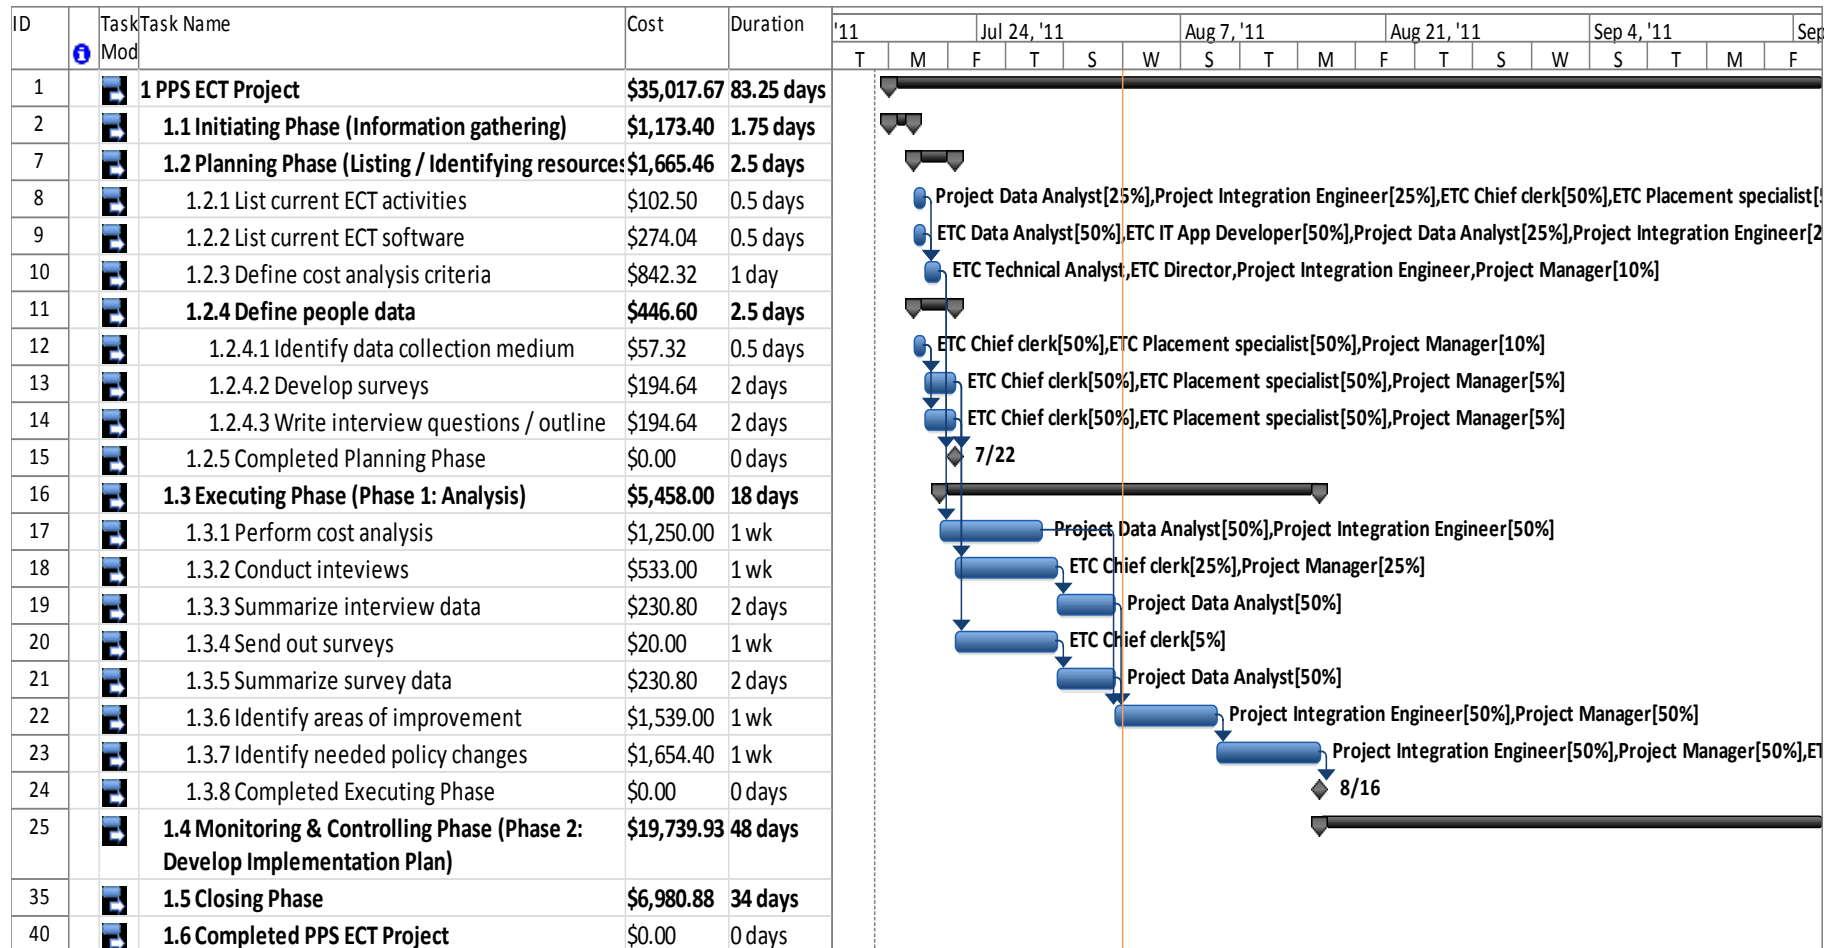

Name	Role	Internal/ External	Position	Communication and correspondence information.
ETC Director	Project Sponsor, acceptance of project charter, policy change procedures, Inform stakeholders of policy change procedures	Internal	ETC Director	
Chief clerk	Identify data collection medium	Internal	Chief clerk

"Discount Rate and Wages are Local/Region Sensitive (Wa.) " - Financial Analysis has been modified to become more aligned with WBS and other Project documents	
Bureau of Economic Analysis 2010-2011 (Wa.) "Q2" GDP Deflator Rate/Index Wa. GDP = 1.7 National GDP = 3.7	
Bureau of Labor Statistics 2010-2011 (Wa.) "Q2" CPI = .04 (Wa Consumer Price Index) EPI = .044 (Wa Employment Price Index)	
<u>Annual Discount Rate = ((.017 + .037 + .04 + .044)/4) + (2 points - uncertainty) = .0545 (5.45%) // Quarterly Discount Rate = (.0545 / 4) = .0136 (1.36%)</u>	
Indexed Wages were pulled from GlassDoor.com website, Estimated Durations are hypothetical and are not representative.	
Wages found in Project Cost Estimate are indexed wages increased by 30% to cover employee benefits, compensation, insurance, union dues... ***The discount rate has been increased two points due to uncertainty, DR and Wage data neglect: additional local economic indicators, assumes current quarter rates will hold constant, neglects time value of money charts/tables/indexes, neglects parametric estimating tools for wages which may include additional buffer variables...***	
***The financial analysis was broken into a four phase payment schedule: > Month (0) - an initial 30% of Project Bid (funds to begin project) > Month (3, 6, 9) - three equal payments of remaining project bid balance (= (\$122,573.76-\$36,772.13)/3 = \$28,600.54)	

Set 2: Bureau of Economic Analysis, Bureau of Labor Statistics, Whitehouse.gov

Issue Log

Issue #	Issue Description	Impact on Project	Date Reported	Reported By	Assigned To	Priority (M/H/L)	Due Date	Status	Comments
1	Establish population pool to interview & create an interview committee	Key component of main deliverable	7/1/2011	Aron Yucha	Aron Yucha	High	7/15/2011	Closed	Population Pool has been established. Interview Committee has been created.
2	Marty and Jared on vacation 8/13/2011 – 8/27/2011	Members of Interview Committee: impacts interviewing process, scheduled stakeholder meetings, daily work output/production	8/1/2011	Marty & Jared	Rafael Colon	High	8/5/2011	In Progress	Need to establish work-arounds for high priority tasks
3	Team Member Birth Window: (8/5/2011 – 8/15/2011)	Part of Interview Committee, Working on Business Flow analysis	7/1/2011	Niharika Jeena	Rafael Colon	High	Pending	In Progress	What-If Analysis, Scenario Planning has commenced. Work-Around Plan A, B, C established.
4	Create ABC (Work-Process, Organization, Activity) Flow Charts	Schedule	8/1/2011	Marty Flansburg	Marty Flansburg	Med.	8/13/2011	In Progress	Marty is working on creating charts to aid in business analysis
Issue #	Issue Description	Impact on Project	Date Reported	Reported By	Assigned To	Priority (M/H/L)	Due Date	Status	Comments
5	Current ABC Policies subject to change	Schedule, Budget	8/1/2011	Judy Brennan	Group 1	Med.	8/11/2011	Pending	Policy Reform Committee will announce changes on 8/11/2011
6	Outsourced Consulting Firm hired for Survey Activities cannot contact SME	Morale, Schedule	8/3/2011	Consulting Firm Rep.	Jared Omulindi	Med.	8/11/2011	In Progress	Jared is working on establishing a communication plan for these stakeholders

7	Selected Technology Consultant (Web Design & Software) could potentially miss Install deadline	Potential Impacts: Budget, Schedule, Team/Community Morale, Complicate ABC Transfer Process for coming year	8/5/2011	Rafael Colon	Aron Yucha	High	8/13/2011	In Progress	Stakeholder meetings have been conducted. Schedule adjustments have been evaluated and approved, cost-benefit analysis has been conducted, new RFB has been posted, Activities remaining: Vendor analysis, recommendation, and selection.

P = Performing organizational unit

Meeting Agenda / Interim Presentation

Date: Thursday, July 28, 2011

Time: 10:20 pm

Location: FAB room 50-05

Chair: Rafael Colon

Attendees: Jared Omulindi, Niharika Jenna, Aron Yucha, Marty Flansburg

Objective: To confirm tasks for Set II Deliverables.

Agenda:

Introduction/Background: All members (3 minutes)

- Brief description of current status

Questions: All (5-10 minutes)

1. Which tasks need to be completed first?
2. Which tasks can be completed later in the week?
3. Who can start working on the important tasks first?
4. When will each member be working on and completing their assignments?

Next Steps (Outcomes of this meeting): (Bulleted list of who will be doing what)

- **Aron**
 - Financial Analysis
 - Issues Log?
- **Marty**
 - Correspondence with SME
 - Meeting minutes
 - SME evaluation at Pulse check
- **Rafael**
 - RAM
 - WBS
- **Niharika**
 - Resource Usage Report
 - Team Contract
- **Jared**
 - Risk Register
 - Stakeholder Register
 - Stakeholder Strategy

Next Meeting: Week of 8/1-5/2011.

Risk Register

No	Risk(positive/Negative)	Category(H/L/M)	Contingency Plan
1	Federal title 1 fund	H	Possible cuts to transfer program.
2	State schools funds for 100 students will be lost if inter-district transfer requirements are not met	H	Possible cuts to transfer program.

3	25 programs and associated school enrollment is threatened	H	Eliminate programs.
4	Lack of executive support	L	Need to find champion.
5	Lack of user support due to fear of job loss	L	Awareness education.
6	Commitment of project team to the project	L	Replace personnel.
7	Current hardware/network may not support the new system.	M	Upgrade HW or design new solution.
8	Supplier may supply the equipment late or an equipment that is not compatible with the available network	M	Put clause in purchasing agreement.
9	With rapid changing tech knowledge, it might be hard to satisfy the customer	L	Teach customers.
10	The systems super user might find another job opportunity before the end of the project	L	Hire replacement.
11	Competitor might lower the cost of the service and cause the customer give the contract	L	Lower price or offer better service.

Lessons Learned

Prepared by: Team 1	Date: 8/8/2011
Project Name: ABC Enrollment and Transfers	
Project Sponsor: ABC	
Project Manager: ABC	
Project Dates:	
Final Budget:	
<ol style="list-style-type: none">1. Did the project meet scope, time, and cost goals? We met scope, time, and cost criteria.2. What was the success criteria listed in the project scope statement?<ul style="list-style-type: none">• The project aims to automate various processes, such as; filling an application, updating the database and data retrieval.• Time, cost and quality metrics and effort estimation models will be implemented.• Develop list of priority services aligned with district goals.• Streamline operations within 3 months such that current levels of service can be maintained despite reduction in available resources.• Shorten processing time after automation of enrollment and transfer services.3. Reflect on whether or not you met the project success criteria. As mentioned above we interviewed and send out surveys to find gaps in the current system and had come out with project management plan , communication plan, cost benefit analysis, what if analysis, workaround plans (Plan A, Plan B, Plan C).In order to prioritize services stakeholder meetings had been conducted. We prioritized all the services available in ABC. After prioritizing services suggestions for improvements has	

been sent so that automation of current system can be performed smoothly.

4. In terms of managing the project, what were the main lessons your team learned?

- Good Teamwork: Prioritizing and distributing work on time and submitting work assigned before the schedule so that your team can review it before sending it to other stakeholders in the project.
- Good Planning: Spending more time in planning phase had paid its cost. It was easier to follow all the processes in the project when we had a good set of documents such as WBS, project charter, business case, communication plan, team contract, pre financial analysis, prioritized risk list.
- MS project software was helpful to create WBS, allocating resources, Resource Usage Report, following milestones for the projects.

5. Describe one example of what went right on this project.

Communication within team was good. Team had defined its approach for documentation and distributed workload evenly. Team members were flexible to make changes and updating documents.

Identifying Risks: It helped a lot in managing cost and schedule and creating mitigation plan to avoid risks on time. We were able to integrate contingency plans to our project schedule. It was easier to relate cost control and budget issues to identified risks.

6. Describe one example of what went wrong on this project.

Third party vendor were not allowed to communicate with SME to conduct survey which affected the schedule initially created.

Not knowing the organization's process effectively to implement the project.

Here was no escalation procedures for corrective actions

7. What will you do differently on the next project based on your experience working on

this project?

We will have a better communication plan for third party vendors.

Coordinate process improvement activities more effectively

Issues which are not closed yet will be tracked down and corrective action will be taken in order to improve the process

Look for historical data to know the trend and to know the business objectives.

Future Opportunities

Current System:

- Partially Automated
- Different Languages
- Too much manual verification

The current system is partially automated where transfers are done online but verification of transfers is done manually. Manual verification is required for inter district transfers since public schools in other districts are not connected to ABC. Verifications for the lottery system are also only partially automated.

New petition forms are processed manually in the current system since most parents are not tech savvy and quite a few have Spanish and Russian as their primary language.

Even if we consider a scenario where 20 percent people do not understand English and another 25 percent are not tech savvy; that still leaves 55 percent who speak English and could use the online petition process. It saves almost 55% of manual work.

New System:

- Automate the verification process

- Automate filing new petition process
- Create a workflow to Approve/Reject application
- Role Based Access to reports
- Prevention from Cyber attacks

Eliminate manual verification: New system will automate the verification process, based on the conditions specified by the ETC management.

Workflow Process: A workflow process will be set up to approve the application for transfers and new petitions. Final decision will depend on the ETC director or the person who normally approves the application. An automated mail will be sent to the responsible person, as well as a reminder mail, if he or she takes too much time to approve or reject the application. Approved/Rejected applicants will get an email if they have provided email id in petition/transfer form, instead of paper, to save cost.

New Petition: New petition form can be streamlined by automating the process with the processes which are already available online or computerized.

All the reports will be accessed over Intranet where each report will only be seen by an authorized person. Roles will be set up on a need to know basis.

All internal applications will be managed over LAN. External petitions directly filed by parents will be processed over WAN using firewall for security to prevent cyber-attacks.

Application Forms:

All application forms will be filled online with an option of doing it offline using word doc, pdf etc. Examples of forms that can be used online to integrate the transfer's process are as follows:

- School Choice Checklist
- Supervision Agreement
- Petition Transfer Request Form
- School Choice Application
- Request for Enrolling Resident Students

Tools and Automation

- Server running Redhat Linux
- A minimum of 10 PCs running Windows OS, 1 on Linux OS and 1 Mac desktop running OS X
- Processors: Intel Core 2 Duo / i3 / i5 / i7 class or AMD Phenom Class processors
- Database: Oracle 11g
- Minimum 4GB RAM for workstations, Minimum 8GB RAM for Servers
- 250 GB Hard Drive
- Automation Tools will be used for Stress, Volume and Load Testing.
- We will also use automated tools for defect tracking and test log creation
- For Quality assurance we are plan to use Automated Build Studio by SmartBear Software

Future Opportunities:

- Archiving old documents electronically
- Centralized system for all districts in Oregon
- Approval/Rejection letter review

As discussed in the interview process old documents are rarely needed. Another process can be set up where all the old documents which are in paper can be archived electronically to prevent any damage in future such as from fire, water. However, archiving will not be a project priority at this time.

If at some point the decision is taken to integrate the ETC process with the centralized system for all public schools in Oregon, we would appreciate it if our team is considered for that project.

During interview process we found out that parents find it difficult to understand whether their child's application has got accepted or rejected. Most of them come back to ABC looking for answers. This takes up time and resources. The letter should be revised in order to eliminate this overhead.

Thank You Letter

August 8, 2011

XXXXXXX

Director

ABC Enrollment & Transfer Center

501 North Dixon Street

Portland, OR 97227

Dear XXXX:

Please accept our gratitude for the supportive role you played in our ETM 510 – Project Planning and Implementation course project, at Portland State University, this summer. The time you spent working with us was an extremely valuable tool in our learning of project management theory and application.

You allowed us to gain knowledge of the problems you, and ABC, face with the upcoming budget cuts. This scenario helped to illustrate to us how a quality project management plan would need to be in place prior to any lost funding.

Your willingness to participate in a “real-world” problem for our course added a dimension that could not have been covered otherwise. We hope that the experience was mutually beneficial as well.

Thank you for giving your time and effort to aid in our learning.

Sincerely,

Rafael Colon
Marty Flansburg
Niharika Jenna
Jared Omulindi
Aron Yucha
